

RDC : Rotary Die Cutter

THE LATEST GENERATION DIE CUTTER

Overview

The RDC is the ideal machine for the production of high volumes of boxes, labels and personalized items, such as business cards, greetings cards and postcards. It guarantees a professional quality and has a fast working speed. It is designed to meet the needs of today's digital print applications, including short, medium and long run custom shaped products

The RDC has a simple easy to use touch screen that has various setting adjustments for fine tuning the die location to the image, as well as adjustments for waste separation, job change and job storage.

Accuracy of the cutting can be controlled by working from the lead edge or a printed registration mark of the sheet, side alignment also ensures that accuracy is repeated every time.

The RDC is an easy to use device. Its intuitive settings enable you to produce up to 4,000 sheets / hour, enabling you to quickly meet any finishing requirement.

The RDC can be supplied with or without the sheet separator which can be added at a later date if required.

Cost Effective

The RDC is an incredibly efficient and cost-effective method of producing high volume cut items, meaning you can now truly offer an all in one stop for your customers.

Increase the service you offer and cut unnecessary costs, whilst having the flexibility to choose your own lead times rather rely on a third party. With its fast production speed and simple to use setup, the RDC is the perfect investment for 'on demand' printing and finishing.

Accuracy at high Speed

With a very impressive running speed or 4,500 sheets per hour there is no other rotary die cutter on the market with such an impressive specification at such a competitive price.

Using a top sheet air feed system, deep pile feeder and double sheet detector the RDC Rotary Die Cutter reduces the problems which can occur with today's demanding digital outputs!

Key Features

- Flexible dies for custom shaped products
- 4500 sheets per hour
- Top sheet, air suction deep pile feeder
- Simple and quick die changeover
- Sheet separator
- Die cut, kiss cut, score and perforate in one pass the following items
 - Labels
 - Tear off vouchers
 - Business cards
 - Greeting cards
 - Postcards
 - Tickets
 - Playing Cards
 - Boxes
 - Personalised packaging items

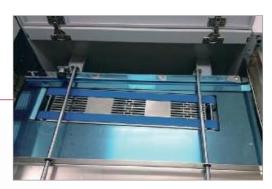

"This revolutionary new machine combines speed, easy operation and quality and is the ideal solution for your in house commercial die cutting requirements."

RDC : Rotary Die Cutter

Die on the cylinder

Composed of an upper magnetic cylinder and a lower counter cylinder. The operator can quickly install the matrix by inserting it into the pins.

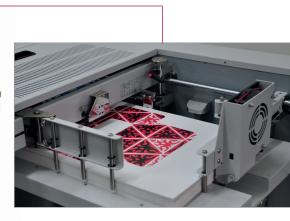

Side alignment

The adjustable alignment straps allow the machine to maintain the correct position of the sheet inside the alignment plate.

Waste Removal

An easy-to-remove tool allows you to separate the finished product from the waste when the sheet passes through the machine

Suction feeder

High capacity suction feeder with a 400mm capacity, enables low and high volume of production runs.

Intuitive user interface

8 "touch screen user interface that is simple and easy to use for quick job set-ups.

Technical Specifications

| Maximum sheet size | 368mm x 508mm |
|-------------------------|-----------------------|
| Minimum sheet size | 210mm x 210mm |
| Maximum die size | 381mm x 508mm |
| Minimum die size | 160mm x 100mm |
| Maximum die cut area | 361mm x 472mm |
| Minimum die cut area | 144mm x 70mm |
| Maximum paper thickness | 400gsm |
| Minimum paper thickness | 120gsm |
| Maximum speed | 4,500 sheets per hour |
| Feeder pile height | 400mm |
| Dimensions | 282 x 80 x 107(h) cm |
| Power requirement | 220 Volts AC |
